PHASES OF OUR APPROACH

Planning & Requirement Analysis
Detailed requirements from stakeholders. Estimate resources, time, and budget. Prioritise features and set milestones.

System Design
Define the system's overall architecture. Database structures, system interfaces, and user interactions.

Implementation
Code the software based on detailed designs. Follow best coding practices and utilize version control.

Testing
Perform unit, integration, and system testing. Conduct UAT to validate functionality against user expectations.

Deployment & Integration
Prepare and deploy the software in the target environment. Integrate systems and ensure smooth operation.

Maintenance, Support, & Review
Continuously monitor and update the software as needed. Periodically review the process and continuous improvement.

Work Process
